

### Introduction

It all starts with a dream of owning a home. To turn that dream into reality, a consumer usually turns first to a loan originator or a real estate agent for help.

As a member of the mortgage industry, consumers look to you for guidance throughout the home-buying process. But where can *you* go for guidance? At MGIC, we know how many steps, people, processes and rules are involved in the whole Mortgage Cycle. And that's why we prepared this program, *Putting the Pieces Together*.

Putting the Pieces Together takes the main pieces of the home-buying process and explores and explains each piece, from taking a loan to closing, servicing and selling it. You'll learn how The Four Cs of the mortgage industry — Credit, Capacity, Capital and Collateral — can help determine whether a consumer can be a successful homeowner.

Once you have completed this course, you can better position yourself as an expert to your customers. Whether you are prequalifying consumers and determining what they can afford; or you are guiding them through the current real estate market and targeting homes in their price range, consumers look to you for expert advice and direction. You'll be able to explain to them exactly how The Four Cs will affect their ability to purchase and own a home.

The mortgage business is a risk-based business. But the more you know and understand about the process, the more it will help minimize that risk for your company and your customers — and the more it will increase your success as a mortgage professional. *Putting the Pieces Together* puts all the information you need in a convenient, easy-to-read package.

If you have questions about any of the information presented in *Putting the Pieces Together,* please contact your MGIC Account Manager.

#### Symbol Key

The following icons are used throughout the *Putting the Pieces Together* series to highlight details, tips and shortcuts to greater understanding of the Mortgage Cycle.

Dictionary: Industry jargon and acronyms explained in straightforward language

File It: Important documents that must be included in the loan file

**Take Note:** Information, shortcuts or exercises that can make your job easier

Checkpoint: Helpful review points to help you ensure that you've got everything needed to complete the loan file

# MAKING AN INFORMED UNDERWRITING DECISION

The loan has been processed and documented. The diligent groundwork of the processor has prepared us for the Underwriting stage of the Mortgage Cycle (page 38) where all of the bits and pieces of data and documentation come together.

Here, at the hand of the underwriter's keen analytic skills, The Four Cs are measured, the big picture is revealed, and the borrowers' request for a mortgage loan is soundly answered.

While Credit, Capacity, Capital and Collateral are evaluated as a whole to come to a decision, we will examine them individually. First up is Credit, the borrowers' willingness to repay the loan based on their prior use of credit. At the end of this section, you will be able to:

- define traditional and nontraditional credit
- identify the five key sections of a credit report
- identify key information necessary for evaluating creditworthiness and willingness to repay debt

#### Throughout this book:

- The role of The Underwriter will be played by you.
- "Borrowers" refers to both multiple borrowers or a single borrower.

## Credit Risk: Measuring Willingness to Repay

How likely are the borrowers to repay their mortgage? That's The Big Question. That's where the gamble lies. That's where evaluating the borrowers' credit comes in.

Credit quality is one of the most important indicators in determining how a loan will perform. Experience shows that the number of mortgages that fail increases dramatically as the number of adverse borrower credit ratings increases.

#### Credit History

That's why it's so important to evaluate each prospective borrower's credit history — especially for those with low-down-payment loans. As an underwriter, you need to consider all available information to determine whether the borrowers have:

- demonstrated a consistent willingness to pay obligations as agreed, and
- proven their ability to manage their finances over time and under various circumstances

Those who have are more likely to be successful homeowners, that is, more likely to repay their mortgages.

As you review your borrowers' credit quality, your concern will lie more with the overall pattern of making payments rather than an occasional late payment that isn't necessarily due to a disregard for credit obligations.

Each borrower should have an adequate credit history defined by the number of accounts and length of time the accounts have been used.

**Established credit** – Borrowers with established credit have a history that can be verified through traditional credit reports.

Generally, a credit score is the indicator of a borrower's payment history. Typically, investors define acceptable credit scores.

**Re-established credit** – When the credit report indicates that borrowers have a history of late payments, acceptable credit must be re-established.

Where there are late payments, underwriting judgment is required to determine the borrowers' intent — whether payments were late due to a lack of regard for financial obligations or to factors beyond the borrowers' control. Look at the frequency and timing of late payments, why they occurred, their severity and the size of account balances. Give additional consideration to borrowers who demonstrate stable income and a savings history.

The borrowers' reasons for failure to pay as agreed must be reasonable, corrected and unlikely to recur. The borrowers should provide these reasons in a Credit Explanation Letter, including time frames that match the time of the delinquency.

Adverse credit history – Review the past 7 years for major derogatory credit such as foreclosures, bankruptcy and judgments. Take a solid look at the past 24 months for tax liens, collections, charge-offs and repossessions.

#### Common types of bankruptcy

Chapter 7 or "liquidation" bankruptcy – Overly indebted individuals or businesses liquidate assets to pay off as much debt as possible. Any remaining unpaid debt is discharged.

Chapter 11 or "corporate" bankruptcy – Overly indebted businesses — or occasionally individuals with substantial debts and assets — are able to continue to function and retain control and ownership of assets while they pay off debt in accordance with a reorganization or repayment plan worked out with creditors.

Chapter 13 or "wage earners" bankruptcy – Overly indebted individuals with a regular source of income are able to retain control and ownership of assets while they repay all or part of their debt in accordance with a repayment plan worked out with creditors.

Nonestablished credit – A borrower whose credit cannot be verified through traditional sources is considered to have nonestablished credit. Nontraditional credit references must be used for these borrowers. See *Nontraditional documentation* below.

No credit history – In general, borrowers with no credit history available pose a higher risk simply because there is no information to substantiate their ability to manage debt. It is difficult to make a prudent underwriting decision with no credit history.

#### Credit Documentation

At this stage of the game, your processor has gathered credit documentation to substantiate your borrowers' credit history in one of two forms:

**Traditional documentation** – includes any type of credit reported on a credit report, such as credit cards, department store accounts, auto loans and mortgage debt.

#### Authorized user

When a credit account owner permits another person, typically a family member who is managing credit for the first time, to have access to use an account, the user is referred to as an "authorized user" of the account.

The practice is intended to help related individuals legitimately establish a credit history and credit score. based on the account and payment history of the account owner, even though the authorized user is not the account owner.

Nontraditional documentation – is used in cases where borrowers have not established traditional credit and includes alternative information to document their credit history, such as:

- · receipts for current and previous rent payments
- verification of utility payments, such as telephone, electrical, cable TV, cell phone, etc.

Many investors require nontraditional credit to be reported on a nontraditional credit report. (See The Credit Report.)

#### The Credit Report

The credit report offers a unique, two-dimensional perspective of the borrowers' past and present regard for credit. As an underwriter, you can use their historical repayment patterns and their current state of affairs to make an educated prediction of their future respect and regard for credit.

Three national credit repositories — Equifax,
TransUnion and Experian — maintain centralized
credit records on consumers. These repositories
receive information from virtually all businesses that
extend credit to consumers and provide credit reports
to those that need to evaluate individual consumer's
creditworthiness.

All credit reports for an individual borrower must not be more than 120 days old at closing or 180 days old at closing for new construction loans.

The most common types of reports used in the mortgage industry include:

#### Residential Mortgage Credit Report (RMCR) -

Often referred to as a "standard factual report," the RMCR obtains information from at least two credit repositories and merges it into a single report. Information is researched and updated to include employment, residence and public records. This typically is the most expensive option.

In-File Credit Report – Information is taken separately from one or more credit repositories with no merging, editing, updating or confirmation of employment, residence or public records. Separate reports must be requested from each credit repository. These reports typically cost less than the RMCR.

Merged Credit Report – Data is drawn from two or more credit repositories and then matched and merged into a single report. Information such as residence, employment, etc., is not confirmed or updated. This option is usually priced somewhere between the RMCR and the In-File report.

#### Non-Traditional Mortgage Credit Report (NTMCR) -

Some investors require NTMCRs for those prospective borrowers who have not yet established a credit history or who do not use traditional credit. An NTMCR may not be used to enhance the traditional credit history of borrowers with poor payment records.

The look and layout of a credit report varies, depending on the type of report requested and the company providing it; but the information presented is similar. It's important to become familiar with the different types of reports so you can locate key information easily and quickly.

Using the information on the following pages, complete the Navigating Through the Credit Report exercise on page 22 to practice locating pertinent information.

- Identifying information This section provides critical information that identifies each borrower and should match the information found on the 1003, including:
  - applicant names, including spouse's, if applicable
  - nicknames, aliases (AKAs)
  - · Social Security number
  - current addresses

It will also indicate whether the report is a joint report, combining the credit history for both borrowers, or an individual report with the credit history for each borrower provided separately.

Additional identifying information will be included later on in the report.

Credit scores – Credit scores may or may not appear on the credit report, depending on your company/investor requirements.

If they are on the credit report, they provide a way of quickly assessing the borrowers' credit quality. The credit reporting agencies arrive at these scores by evaluating risk factors through a series of automated statistical models. TransUnion Corp. (TUC) uses the Emperica Score Model; Experian (XPN), the Fair Isaac Score Model; and Equifax (EFX), the Beacon Score Model.

The resulting numeric score indicates the likelihood of a borrower repaying the loan in a timely manner. Scores typically range from 300 to 850. (The majority of scores you'll come across will range from 600 to 800.) The lower the credit score, the greater the risk associated with the likelihood to repay.

Fannie Mae and Freddie Mac recommend that lenders obtain a minimum of two credit scores for every applicant, but prefer three scores, if possible. Obtaining multiple scores allows for variations in the manner in which credit is reported. Lenders can then select a representative or indicator score to use in underwriting the borrowers' loan.

#### Which Credit Score to Use

#### Example: 1 borrower / 2 scores

Credit Repository	Borrower's Credit Score
TransUnion	680
Equifax	674

If two scores are provided, the representative/indicator score is the lower of the two scores — 674 in this case.

#### Example: 1 borrower / 3 scores

Credit Repository	Borrower's Credit Score
TransUnion	675
Equifax	685
Experian	666

If three scores are provided for one borrower, drop the highest and lowest scores (685 and 666). The remaining score is the representative/indicator score — 675 in this example.

#### Example: 2 borrowers / 3 scores each

Credit Score		
Credit Repository	Borrower A	Borrower B
TransUnion	676	662
Equifax	660	685
Experian	654	690

If three scores are provided for each borrower, drop the highest and lowest scores (676 and 654 for Borrower A; 690 and 662 for Borrower B).

Then compare the two remaining scores (660 for Borrower A; 685 for Borrower B). The lower of the two is the representative/indicator score — 660 in this example.

		Fraud Alert		
	No Fra	ud Records Found.		
	4 No Public Re	cord Information Found.		

- 3 Identifying information More detail identifying the borrowers is included in this section of the credit report, including:
  - previous addresses
  - · current and previous employers
  - date of birth
- Public record information identifies state and county court records related to bankruptcies, tax liens or monetary judgments. In some states, the credit report will list overdue child support payments.

As a general rule, all judgments, collections and lawsuits must be paid or satisfied in full by the borrowers prior to, or at, closing. In addition, the borrowers must provide a thorough, written explanation. Review investor guidelines for specific requirements as there may be exceptions to the rule.

- Credit History This section lists the borrowers' current and past credit accounts or tradelines with banks, retailers, credit card issuers, lenders and other credit issuers. The Credit History section indicates:
  - whether anyone else besides the applicant, such as a spouse or cosigner, is responsible for paying the account
  - · the date the account was opened
  - · the credit limit or loan amount
  - the account balance
  - the monthly payment, if applicable
  - the terms or manner in which the borrowers repay or repaid the accounts

Accounts are identified by type, denoted by a letter code or an abbreviation:

- R or REV denotes a revolving credit account, like a MasterCard or VISA
- I or INS indicates installment credit, such as an auto loan
- O indicates an open account which requires that the balance be paid off each month
  - for example, American Express
- M denotes a mortgage loan

The meaning of the codes is usually indicated on the report.

When the monthly payment is not included for a revolving account, the payment should be calculated at 5% of the stated balance or \$10, whichever is greater.

If your borrowers currently have a mortgage that is not included on the credit report, you will need to verify the mortgage payment history for the last 12 months, either by direct verification with their mortgage company or with 12 months of cancelled checks from the borrowers.

Debts with 10 or fewer months remaining can generally be excluded from the total liabilities. The exception to this rule is an auto lease payment, which must be counted, regardless of the number of months remaining, as typically it would be replaced with a new lease or loan payment on the buyout of the current lease.

Accounts are rated, based on the borrowers' timely repayment of debt. These ratings can vary among different credit reports:

#### A series of numbers or characters representing months –

Some credit reports use ratings like 001111111011 or 00XXXXXXXXXXX, where:

- a 1 or an X indicates payments made on time
- 0 denotes a zero balance for the month
- any other number 2 through 9 indicates varying degrees of delinquency

#### Defined columns for 30-, 60-, and 90-days late ratings -

The number of times a borrower was 30, 60 or 90 days late will be tallied under the column headings. For example, 1/2/0, indicates 1 payment was 30 days late; 2 payments were 60 days late; and 0 were 90 days late.

Combining the rating with the account type – You may see an account coded R2, R1, M2, I9 and so on. Anything other than a 0 or a 1 listed after the account type indicates delinquent credit at some point in the payment history.

**Collections** – Collections are usually identified separately at the end of the listing of credit accounts. Collections occur when the creditor hires a collection agency to pursue the borrowers for payment of the debt.

Charge-Off Account – A charge-off occurs when the creditor has not been paid for a significant period of time, decides to write-off (or charge-off) the balance due to bad debt and closes the account. The creditor will often do this rather than take legal action against the borrowers. Charge-offs will usually be indicated as 'Charge-Off' or a 9 rating (e.g., R9).

It's very important to be able to recognize delinquent or adverse credit on a credit report. Adverse credit can be reported many different ways, depending upon the individual credit reporting agency.

6 Inquiries – This section of the credit report identifies the names of all credit grantors who obtained a copy of your borrowers' credit report for any reason. Additionally, it lists anyone who accessed the report over the past two years. Federal law requires the two-year retention for employer inquiries, but only six months for credit grantor inquiries.

# Checkpoint: Do you have everything you need to evaluate credit?

Expedite underwriting, deliver better customer service and reduce job stress by completing these credit evaluation checkpoints:

## Does the information on the credit report match what's on the 1003?

- Check Social Security numbers to ensure that the report received is for the correct borrowers.
- Compare employment information on both documents. If it's not a match, obtain from the borrowers an explanation clarifying the difference.
- If any debts are missing from the credit report, obtain from the borrowers a separate verification for each missing debt. If debts appear on the credit report but not on the 1003, obtain a written explanation as to why the debts were not disclosed. Modify the 1003 to include the debts.

# Whose underwriting guideline are you satisfying — your company's or the investor's?

A credit history for each borrower listed on the 1003 must be evaluated according to your company/investor credit guidelines.

#### What is the intent of the guideline?

Underwriting must determine the willingness of the borrowers to repay debt in a timely and responsible manner.

#### Does the information received satisfy the intent of the guideline? If not, what information can be provided that would satisfy it?

Obtain additional information for further evaluation, including documents to support an explanation. Obtain clarification to explain or compensate derogatory information.

## Are there any new loans appearing on the credit report?

Review the accounts listed on the credit report. Have the borrowers taken out any new loans recently? If so, you will need to determine whether the new loan is secured by the property or is an unsecured loan. If it is an unsecured loan, you will need to determine whether it affects the borrowers' ability to qualify.

# If a credit explanation is necessary, does it satisfactorily address the following questions?

- Is the explanation reasonable?
- Are facts and dates presented logically, and do they support the borrowers' story (e.g., divorce decree, satisfaction of judgment, paid receipts)?
- Was it a one-time incident such as a medical or insurance problem?
   Or is there an indication that a pattern exists, and the problem will recur?

# CAPACITY: ASSESSING THE ABILITY TO REPAY

Capacity addresses the risk involved with the borrowers' ability to repay the mortgage based on the amount and stability of income. As the underwriter, it's up to you to determine whether the borrowers will be able to make the proposed new mortgage payment and to meet all of their other monthly obligations.

By the end of this section, you will be able to:

- identify documents required to verify specific types of income
- calculate monthly income

### **Evaluating Income**

It seems almost too obvious to say that income is critical in repaying a mortgage. But the risk involved in the mortgage transaction relative to income goes beyond the borrowers merely having income and includes many considerations. For example:

- Is the amount of income enough to make the monthly mortgage payment and still meet monthly household obligations?
- Do the borrowers have a history of income stability?
- Is the income stable and likely to continue?
- Does their employment history reflect stability? If gaps are present, can the borrowers account for them?
- If a borrower has had more than one job, what are the reasons for job changes and length of time employed, as well as transferability of job skills?
- Has the borrower changed jobs in order to increase pay or benefits incrementally, or to gain greater job security? (These circumstances are viewed as positive underwriting offsets.)
- Are the borrowers employed full- or part-time? Seasonally?
- Do the borrowers have more than one job? Is the total amount of hours they work in a week sustainable? Is it necessary to qualify?
- What is the source of income? Salary? Commission?
   Self-employment? Pension?
- Are both borrowers' incomes being used to qualify for the loan?
- Do the borrowers indeed earn what is reported on the 1003?

#### **Documenting Income**

To answer those questions and others that individual situations may raise, we need to determine:

- the source of the borrowers' income to establish income stability, and
- the borrowers' income history to determine the likelihood that a similar level of income will continue

The source of income affects the documentation required for verification. For example, for a borrower who is currently employed, you may require a pay stub and a W-2 to fulfill documentation requirements, while for another who receives Social Security income, you may require a copy of an awards letter.

The table on the next page lists typical documentation required by many investors. Be sure to check your company/investor quidelines for specific documentation requirements.

Source of Income	Documentation Requirements
Salaried/Hourly Income	<ul> <li>Most recent year-to-date (YTD) pay stub dated no earlier than 30 days from date of the application and including at least 30 days of YTD earnings</li> <li>W-2s covering the prior year</li> <li>Verbal verification of employment (VOE):</li> <li>Completed within 30 days of the closing date</li> <li>Independently obtain phone numbers and, if possible, addresses for the borrowers' employers</li> <li>Document the names and titles of the persons that confirmed the employment</li> <li>Document the date(s) of the call and the source of the phone number</li> <li>Include the name and title of the processor/ underwriter who performed the verification for the lender or written Verification of Employment (VOE), including year-to-date and prior year's earnings</li> </ul>
Self-Employment Income	<ul> <li>Individual federal income tax returns for the most recent 2 years</li> <li>Obtain most recent 2 years of federal business tax returns only if both of these conditions are present:</li> <li>The borrower owns 25% or more of the business</li> <li>The business structure is a corporation, an "S" corporation or a partnership</li> </ul>
Commission Income	Most recent YTD pay stub covering past 30 days     W-2s covering the most recent 2 tax years     Individual federal income tax returns for the most recent 2 years
Bonus Income	Usually a 2-year average for qualification with a 2-year history of earning it from the same employer supported by paystub(s) for the most recent 30-day period with year-to-date earnings and W-2s for the prior 2 years
Income Per Job or Contract Basis	Individual federal income tax returns for the most recent 2 years and, if applicable:  Most recent YTD pay stub, provided by employer, to document the most recent 1 full month of earnings  W-2s covering the most recent 2 tax years (if provided by employer)
Part-Time or Second Job	<ul> <li>Usually, a 2-year history demonstrating stable, recurring income. Income is averaged over 2 years. If history is less than 12 months, the income may be considered a positive underwriting offset.</li> <li>Paystub(s) for the most recent 30-day period with year-to-date earnings and W-2s for the prior 2 years</li> </ul>
Rental Income	Individual federal income tax returns for the most recent 2 years. Note: If the property is not listed on Schedule E, provide a copy of the lease to verify rental income.

Source of Income	Documentation Requirements
Seasonal Income	<ul> <li>Seasonal workers may also receive unemployment compensation during their off-season months, usually verified on IRS form 1040 and averaged over the past 24 months</li> <li>Paystub(s) for the most recent 30-day period with year-to-date earnings and W-2s for the prior year</li> </ul>
Boarder Income	Boarder income should be from a person who currently lives within a borrower's home — not in a rental unit — in exchange for regular, timely rent payments for the past 12 months. Verify boarder's residency history with a driver's license, bank statement or utility bill.
Alimony, Child Support or Separate Maintenance	<ul> <li>Select pages from the applicable agreement supporting 3 years of continuance from closing date</li> <li>Document proof of receipt for the most recent 3 months from one of the following:</li> <li>court payment record</li> <li>cancelled checks</li> <li>bank statements showing the deposits</li> </ul>
Other Sources of Income (Retirement, Social Security, etc.)	<ul> <li>Document the source of income, as applicable with:</li> <li>award letter</li> <li>pension statement</li> <li>2 most recent bank statements</li> <li>IRS 1099, etc., OR</li> <li>Provide complete individual federal income tax returns for the most recent 2 years</li> </ul>
Auto Allowance/ Expense Account Payments	<ul> <li>An auto allowance may be used as an offset to a borrower's monthly auto payment under these conditions:</li> <li>The allowance must have been received for a minimum of 2 years</li> <li>Debt in excess of the monthly allowance or reimbursement should be carried as part of long-term debt</li> <li>Any funds received in excess of monthly obligations will be considered income for qualifying purposes, as long as they are supported by the applicant's tax returns</li> </ul>
Employed by Property Seller, Real Estate Broker or a Closely Held Family Business	<ul> <li>YTD pay stub covering most recent 30 days, and</li> <li>W-2s covering the most recent 2 tax years, and</li> <li>Individual federal income tax returns for the most recent 2 years</li> </ul>
IRS Form 4506	Signed by the borrowers, covering the most recent 2 years' tax returns at application and/or closing. This form permits the lender to obtain tax return information from the IRS. The lender sends in the form.
Employment Gaps	Document employment gaps of more than 60 days with a Letter of Explanation from the borrowers.

#### Calculating Income from Employment

Borrower income can come from a number of different sources, with each source potentially reporting income differently. In order to determine how their new monthly mortgage payment will affect their ability to repay, you need to know how to calculate your borrowers' gross monthly income.

The information you derive from your calculations will go a long way to substantiate your decision whether to approve the loan. To calculate income, you will need to find out:

- whether the borrowers are paid on an hourly basis or with a salary
- how often they're paid weekly, bi-weekly, semi-monthly or monthly

In the not-too-distant past, this information was commonly provided on a document called a Verification of Employment. The VOE would have been procured from the borrowers' employers during the Processing stage of the Mortgage Cycle.

Today, it's more common for underwriters to glean this information from borrowers' pay stubs and W-2 Wage and Tax Statements gathered for the loan file.

Look at the list of different income types below. Which do you suppose have the greatest potential to fluctuate?

- self-employed income
- commission income
- Social Security income
- bonus income
- salaried income

If you selected self-employed, commission and bonus income, you're right. Because these types of income are not predictable, the general rule of thumb is to average them over a two-year period to account for income highs and lows. This will provide a more accurate estimate of the borrowers' typical gross monthly earnings for you to assess their ability to make their mortgage payments over time.

Refer to the borrowers' pay stubs for the most current income. A pay stub may not always indicate how often the borrower is paid. Look for the number of hours worked. For full-time employees paid on a weekly basis, hours worked per week would typically be between 37 and 40. If the borrower is paid on a bi-weekly basis, the pay stub may indicate 75 to 80 hours.

#### Weekly paycheck

If the borrower is salaried...

· If the borrower is paid hourly...

$$\frac{\text{Hours per Week x Hourly Pay Rate x 52}}{12} = \text{Gross Monthly Income}$$

#### Bi-weekly paycheck (paid every two weeks)

• If the borrower is salaried...

• If the borrower is paid hourly...

$$\frac{\text{Hours per 2 Weeks x Hourly Wage x 26}}{12} = \text{Gross Monthly Income}$$

#### Semi-monthly paycheck

A semi-monthly pay stub would generally reflect base pay for the pay period and doesn't state the number of hours worked. Semi-monthly pay periods are usually paid the 1st and 15th of the month. Regardless of the length of the calendar month, there are 2 pay periods.

• If the borrower is paid hourly or salaried...

Base Pay x = 2 = 2 Gross Monthly Income

#### Monthly paycheck

Monthly pay stubs typically state base pay and don't reflect the number of hours worked. Clues that identify whether a borrower is paid on a monthly basis include:

- the date of the pay stub the "pay period ending" date would be indicated as "from and to"
- the dollar amount reported under "current earnings," "earnings for period ending" or similar language, and the year-to-date income information
- If the borrower is paid hourly or salaried...
   Base Pay = Gross Monthly Income

Applying the information on page 14, complete the Determining Gross Monthly Income exercise on pages 23-25 using W-2s and pay stubs for reference.

Because income from self-employment is dependent on the success of the borrowers' business, it's more likely to fluctuate than traditional hourly-paid or salaried income is.

The success of these businesses is subject to factors both within and outside of the borrowers' control. Expertise and experience, credit management and personnel decisions, as well as the economy, market conditions and competition all weigh on the borrowers' ability to sustain an adequate income.

It's important, as you evaluate this type of income, to gain historical perspective in order to be able to make a judgment as to the borrowers' likelihood to repay the mortgage in the future.

For help with self-employed borrowers, ask your MGIC Account Manager about MGIC's self-employed borrower training program, or go to www.mgic.com/training to sign up for an online seminar.

## Checkpoint:

# Do you have everything you need to evaluate income?

Expedite underwriting, deliver better customer service and reduce job stress by completing these income evaluation checkpoints:

## Does employment and income information match what's on the 1003?

• If not, a written explanation from the borrowers is needed to clarify any differences.

# Does the income documentation reflect stable income and employment?

 If not, a written explanation from the borrowers may be needed to explain things such as a gap in employment or a significant increase or decrease in income.

Does the information received satisfy the intent of the guideline? If not, what information can be provided that would satisfy the guideline?

- Obtain additional information for further evaluation (e.g., additional documents to support the explanation).
- · Obtain clarification for complete understanding.
- Obtain from the borrowers a written explanation for discrepancies or gaps in work history.

# CAPITAL: EVALUATING THE COMMITMENT TO REPAY

As an underwriter, you're called on to evaluate the borrowers' commitment to the property and to repaying their mortgage. As their personal investment in their new home, the down payment speaks volumes about their commitment.

There is a direct correlation between the amount of the down payment that borrowers invest toward their purchase and the amount of risk associated with the loan. The greater their investment, the lower the LTV and risk involved. Conversely, the lower the investment, the higher the LTV and risk. (For more information about loan-to-value ratios, see *Putting the Pieces Together Book 3: Processing the Loan Application.)* 

But the down payment is only part of the borrowers' capital profile. You'll also need to evaluate their cash management skills. Both of these factors play an important role in determining repayment risk.

At the end of this section, you will be able to:

- identify documents required to verify specific types of assets
- identify key information needed to evaluate assets

### Examining the Borrowers' Assets

Mortgage industry experience shows that the stronger the borrowers' capital profile is, the more likely they are to repay the mortgage. A capital profile includes the down payment in proportion to the sales price of the home (the loan-to-value ratio) and borrower assets that can be readily converted to cash.

Examining the borrowers' capital profile provides insight into their past, present and future attitude toward and behavior regarding financial security. As you review documentation verifying borrowers' assets, ask yourself questions like:

- Have the borrowers' established a history of strong savings patterns?
- How much is their down payment relative to the sales price of the home?
- Do the borrowers have enough capital available to cover their down payment and closing costs?
- In the event their flow of income is interrupted, do they have adequate savings or other reserves to cover their mortgage payment and living expenses for an extended period of time?

#### **Documenting Assets**

The intent of asset verification is to establish whether the borrowers:

- · have sufficient cash assets to close the loan
- demonstrate cash management skills and/or the ability to save

To verify available funds and cash reserves, look at the most recent two months of statements to determine whether the average savings/investment balance has been consistent over the two-month period.

Check that there are no recent large, unexplained deposit increases, and new accounts are not opened with borrowed money. Total the most recent balances on the savings/investment statements to determine funds available to close.

Look for strong cash reserves remaining after a loan has closed as a compensating factor to offset other high-risk factors that may be present; for example, a significant increase between present housing costs and proposed costs.

The type of asset determines the documentation required to verify available funds. For example, a borrower whose home purchase is contingent upon selling an existing home would need to provide a HUD-1, while a borrower with savings would need to provide bank statements.

The table on the next page lists typical documentation required by many investors. Be sure to check your company/investor guidelines for specific documentation requirements.

Statements under review may be the original computer-generated forms the borrowers received in the mail, faxed copies from the provider or downloaded and printed from the Internet. If the statements are faxed or downloaded from the Internet, they must include the fax banner or Internet banner indicating the source of the information.

Complete the Verifying Assets exercise on pages 26-27 using account statements for reference.

Type of Asset	Documentation Requirements
Liquid Asset Statements (savings, CDs, CMA, retirement account, 401(k), IRA, etc.)	Bank or brokerage statements for the 2 most recent months for each account. In general, use only 60% of value of vested amount for retirement 401(k) and IRAs. Important: If there is a large recent deposit, document the source of funds.
	If retirement fund assets are being used for the down payment or closing costs, provide the following:
	<ul> <li>the most recent statement showing vested amount</li> <li>the conditions under which funds may be withdrawn or borrowed</li> <li>sufficient assets to cover funds needed and any penalties for withdrawal</li> <li>proof of liquidation</li> </ul>
Sale of Real Property	HUD-1 or equivalent closing/settlement statement
Gifts (must be from a relative of the borrower)	Gift information provided by the borrowers on the application or in a gift letter must include:  donor's name and relationship to the borrowers  donor's mailing address and phone number  address of the subject property  amount of the gift
	Note: Donor signature is required if the above information is provided in a gift letter. If the gift funds are not reflected in the borrowers' account statement, provide proof of transfer from the donor to the borrowers.
Sale of Personal Assets (cars, boats, collections,	Provide all of the following when funds from the sale of a personal asset are being used:
etc.)	<ul> <li>proof of ownership of the asset being sold</li> <li>verification of the value of the asset being sold from an acceptable third-party source</li> <li>copy of the bill of sale and receipt of funds</li> </ul>
Borrowed Funds	Borrowed funds must be secured by an asset that provides a return of equity (automobiles, real estate, etc.). Provide the following information:
	<ul> <li>documented ownership of the asset and that the asset secures the loan</li> <li>verified terms and monthly payment, which need to be considered to calculate debt ratio</li> </ul>
Stocks, Bonds, Mutual Funds	Private stock or stock in a closely held or family company is not an acceptable source.
	Stocks, bonds and mutual funds are acceptable sources of funds for the down payment, closing cost and reserves if their value can be verified with either of the following:
	<ul> <li>most recent monthly or quarterly statement</li> <li>stock certificate accompanied by evidence of current value</li> </ul>

## Checkpoint:

# Do you have everything you need to evaluate assets?

Expedite underwriting, deliver better customer service and reduce job stress by completing these asset evaluation checkpoints:

#### Does the asset information match what's on the 1003?

If not, borrowers' written explanation is needed to clarify why the information is different. Minor differences in account balances may be normal (e.g., recent paycheck deposit).

#### Do the statements include the required information?

- name of the institution
- borrowers named as the account holders
- account number
- time period covered by the statement
- all deposits/withdrawals for depository accounts
- purchase and sales transactions for financial portfolio accounts
- ending account balance
- borrowers' name, Social Security number and address (Check that they are consistent with the 1003.)
- · explanations for large deposits
- automatic loan payment withdrawals
- no evidence of alterations, white-out or deletions
- · all pages of the document

If the statement is from the Internet, verify the URL (web address), account number and applicant name; or verify the account number and applicants' Social Security numbers.

# Does the information received satisfy intent of the guideline? If not, what information can be provided that would satisfy it?

- Obtain additional information for further evaluation (e.g., verify additional funds to meet required reserves)
- Obtain clarification for complete understanding
- Obtain written borrowers' explanation or documentation for discrepancies (e.g., a large deposit)

# Are any of the funds toward the down payment or closing costs from an unacceptable source?

If so, further verification of acceptable additional funds would be required. Examples of unacceptable sources include:

- proceeds from a personal or unsecured loan
- · a gift that must be repaid
- cash advance on a revolving charge account or unsecured line of credit

# COLLATERAL RISK: CONFIRMING THE PROPERTY'S VALUE & MARKETABILITY

When a home purchase is financed with a mortgage, the home serves as collateral for the mortgage. As collateral, the home is pledged to the lender or the investor, whomever owns the mortgage. In the event that the borrowers fail to repay their mortgage, the collateral may be sold, with the proceeds used to satisfy any remaining obligations. Quality collateral reduces risk to the lender.

It falls to the underwriter to substantiate whether the property is worth what the borrowers are paying for it. As the underwriter, you decide whether the property meets your company/investor requirements regarding condition, marketability and value, based on the appraisal evaluation.

At the end of this section, you will be able to:

- understand the purpose of the appraisal in mortgage lending
- list appraisal alternatives to the Uniform Residential Appraisal Report (URAR)
- identify key elements of a sales contract

# Establish Value & Marketability

Two documents are key in your evaluation. Information contained on the appraisal report and, if applicable, the sales contract will guide you toward an informed decision regarding whether the collateral would satisfy the unpaid mortgage debt.

#### The Appraisal

Regardless of whether borrowers are purchasing a home or refinancing their existing mortgage, an appraisal will be ordered. Evaluating a residential appraisal is an important step in the loan process. The appraisal is your key to substantiate the value of the property. The appraisal evaluation takes into consideration the neighborhood, site, physical characteristics and condition of the property. Facts, figures, value estimates, property types, location, guidelines and forms all require your close attention. But it goes beyond that, because evaluating an appraisal, similar to underwriting a loan, is an inexact science. You need to use your experience, expertise and good judgment to evaluate and confirm that property value is supported.

Appraisers describe the property noting both the positive and negative factors and explain how these factors affect the value and marketability.

As you review the appraisal, watch for the following:

- Is the property thoroughly described, and has the appraiser noted and explained any unusual situations?
- Is the appraiser's estimate of value consistent with the description of the property?
- Is the value of the subject property supported by the sales price of similar properties?

The most commonly used appraisal is the Uniform Residential Appraisal Report (URAR), Freddie Mac Form 70/Fannie Mae Form 1004. This report is used for single-family residences and gives a comprehensive look at the interior and exterior of the subject property. In addition, it provides a detailed sales comparison approach, which compares recent sales of similar properties within close proximity to the subject property.

Fannie Mae and Freddie Mac established the Uniform Appraisal Dataset (UAD) to enhance the accuracy and quality of loan data. Appraisers must follow the UAD requirements in order for the loan to be saleable to Fannie Mae or Freddie Mac.

For a sample Appraisal Report and highlights of key information to look for, see Appendix D on pages 28-33.

#### Appraisal Forms

Common appraisal forms you may come across include:

Report	Freddie Mac Form #	Fannie Mae Form #
Uniform Residential Appraisal Report	70	1004
Manufactured Home Appraisal Report	70B	1004C
Individual Condominium Unit Appraisal Report	465	1073
Individual Cooperative Interest Appraisal Report	N/A	2090
Small Residential Income Property Appraisal	72	1025
Appraisal Update and/or Completion Report	442	1004D
Market Conditions Addendum to the Appraisal Report	71	1004MC
Loan Prospector Condition and Marketability Report	2070	N/A
Two-to-Four-Unit Residential Field Review Report	1072	2000A
One-Unit Residential Appraisal Field Review Report	1032	2000

For more information on evaluating appraisals, contact your MGIC Account Manager regarding MGIC's appraisal training program or go to www.mgic.com/training to sign up for an online seminar.

#### The Sales Contract

Sales contracts are required only if the mortgage is for a home being purchased. Sales contracts will vary from one part of the country to another, but they generally satisfy the same purpose — to create a legally binding agreement that identifies the actions, conditions and warranties between the buyers (your borrowers) and the seller. That is to say, that the purpose of the sales contract is to detail the conditions under which the sale of the property will take place.

In order to best serve your borrowers, you must be familiar with the key information contained in the contract, as this information is needed to successfully process and close the loan. For example, the closing date determines how much time you have to process the loan, while the purchase price and loan amount requested influence which loan program is used.

To see a sample Sales Contract and highlights of key information to look for, see Appendix E on pages 34-35.

# Checkpoint: Do you have everything you need to evaluate collateral?

Expedite underwriting, deliver better customer service and reduce job stress by completing these collateral evaluation checkpoints:

# Does the information on the sales contract match the information on the loan application?

Key information like names, address and dollar amounts, should be consistent with the information reported on the 1003, as this information will eventually appear on the final loan documents. Inconsistencies should be matched against other documents in the file to determine which information is correct; if unsure, contact the borrowers to clarify.

# Is the contract signed by all involved parties or certified by the escrow company, if applicable?

The sales contract is not a legal, binding document without signatures or certification by all involved parties — buyers, sellers and real estate agents.

## Does the contract include all referenced addenda?

Review the sales contract to make sure that all referenced addenda are included and have the necessary signatures. The signatures make it a binding agreement and the addenda may have critical information needed to successfully process the loan (e.g., change in the closing date).

#### Are any contingencies listed?

Review the contract for any contingencies, as they may affect the loan process or loan approval conditions. Note: If a contingency is the sale of the current home, make certain the information is included on the 1003.

# Does the contract reference the inclusion of chattel property?

Review the sales contract or escrow instructions for any chattel property (e.g., furniture, lawn mower) that may have been included in the sales price. The value of the chattel property will need to be deducted from the appraised value.

# Are there any sales concessions noted in the contract?

A sales concession is typically an item included by the seller as a condition for closing the loan transaction; for example, decorating allowances, cash rebates, etc. These items may affect the value of the property.

## Are there any seller contributions noted in the contract?

Seller contributions typically include items paid by the sellers that are otherwise the buyers' obligations, such as financing costs. Financing concessions are usually interest rate buydowns or a payment supplement provided by the seller. The amount that sellers may contribute to a sales transaction is limited to a percentage of the sales price or appraised value, whichever is less. However, seller contributions cannot exceed the actual costs to close the loan.

The table below lists typical seller contribution limits.

Occupancy Type & LTV	Typical Seller Contribution Limits
Principal Residence	
≥ 90.01%	3%
≤ 90%	6%

#### Does the information received satisfy the intent of the guideline? If not, what information can be provided that would satisfy it?

- Obtain clarification for complete understanding; for example, who will be paying for the repairs noted on the contract?
- · Obtain borrowers' explanation as needed.

# THE FOUR Cs – YOUR GUIDE TO QUALITY

As mortgage professionals, our shared goal is to qualify as many borrowers as possible without compromising the assets of the lender or the investor — and, above all, without compromising the borrowers' ability to successfully maintain homeownership.

By carefully reviewing the borrowers' Credit, Capacity, Capital and Collateral, we can piece together a comprehensive picture of risk. The presence of a high-risk factor in any one of these categories doesn't necessarily threaten successful homeownership. But when a number of interrelated, high-risk characteristics are present without sufficient offsets or compensating factors, their cumulative effect dramatically increases the likelihood of default.

Perspective gained from evaluating The Four Cs gives us insight to loan quality. Underwriting for quality is an acquired art — not a cut-and-dried science. While there are general principles that apply, every loan file represents a unique situation. The more you practice this fine art, the more comfortable, confident and capable you'll become putting the pieces together.

#### **APPENDICES**

# Appendix A

# Exercise 1: Navigating Through the Credit Report

Answer the questions below regarding the borrowers' credit report. Refer to the credit report on pages 4-10. Answers are provided in Appendix F on page 36.

1. Identify the three repository source	. identi	y trie	unee	rep	OSILOTY	/ source:
---	----------	--------	------	-----	---------	-----------

a			
b			
С.			

- 2. How many accounts are listed on the credit report? \_\_\_\_
- 3. List the delinquent credit, collections and charge-offs, if any, as reported on the credit report.
  - Indicate how late the borrowers were (1x30, 2x60, etc.).
  - Provide the date the borrowers were last delinquent, if available.

Account Name	Account Type	# of Times Late	Date Last Delinquent

- 4. List any adverse public records as reported on the credit report.
- 5. List all inquiries in the past 90 days.
  Do the inquiries require an explanation and, if so, why?
- 6. What is the representative or indicator score for each borrower?

- 7. What is the representative or indicator score for the file?
- 8. List the current outstanding liabilities, the type of account and the corresponding monthly payment.

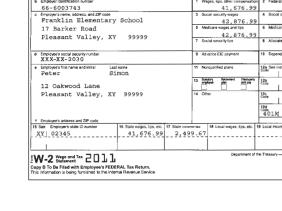

Creditor	Account Type	Payment

Strong appraisal evaluation skills will serve you well as you underwrite loan files. Each section of the report contains information that can affect Collateral risk and, therefore, your underwriting decision.

On the following pages, we've laid out a sample appraisal report and highlighted information you will need to examine in each of its sections.

- Subject provides property address, legal description, census tract
- Contract addresses the appraiser's view of the sales contract, noting anything in the sale that is not typical of the market or that would affect the negotiated price
- 3 Neighborhood includes property location, demand/supply of housing, comments on the neighborhood and market conditions
- Site contains information regarding zoning, off-site improvements, utilities, drainage and flood hazard
- Improvements states style of home, type of foundation and includes an exterior and interior description

#### Uniform Residential Appraisal Report

File # MGIC 202

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

**INTENDED USER:** The intended user of this appraisal report is the lender/client.

**DEFINITION OF MARKET VALUE:** The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in guestion, unless specific arrangements to do so have been made Beforehand, or as otherwise required by law
- 5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

#### APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1.1 have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability. soundness, or structural integrity of the property.
- 3.1 performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9.1 have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood. subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower: the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/ or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws

#### **SUPERVISORY APPRAISER'S CERTIFICATION:** The Supervisory Appraiser certifies and agrees that:

A DDD AICED

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- $5. If this appraisal \ report \ was \ transmitted \ as \ an \ "electronic \ record" \ containing \ my \ "electronic \ signature," \ as \ those \ terms$ are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

- 1. Identify the three repository sources:
  - a. Equifax b. Experian c. TransUnion Corp
- 2. How many accounts are listed on the credit report? 9
- 3. List the delinquent credit, collections and charge-offs, if any, as reported on the credit report.
  - Indicate how late the borrowers were (1x30, 2x60, etc.).
  - Provide the date the borrowers were last delinquent, if available.

Account Name	Account	# of	Date Last
	Type	Times Late	Delinquent
Gas Card	Revolving	1x30	10/11

- 4. List any adverse public records as reported on the credit report. None
- 5. List all inquiries in the past 90 days. Pentagroup Do the inquiries require an explanation and, if so, why? Yes, the Pentagroup inquiry could be a new loan.
- 6. What is the representative score for each borrower? 720 & 742
- 7. What is the representative score for the file? 720
- 8. List the current outstanding liabilities, the type of account and the corresponding monthly payment.

Creditor	Account Type	Payment
American Mortgage	Mortgage	\$931
Autoworld	Installment (Lease)	\$500
Autoworld	Installment (Lease)	\$368
Acme Credit	Revolving	\$32
Gas Card	Revolving	\$35
Discover	Revolving	\$50

# Exercise 2: Determining Gross Monthly Income

- 1. What type of pay period is reflected on the following pay stub:
  - Franklin Elementary School Peter Simon Semi-Monthly
  - Web Vision Inc. Elizabeth Simon Bi-Weekly
- 2. Calculate the monthly base income for each of the following jobs:
  - Franklin Elementary School Peter Simon \$3,708.32
  - Web Vision Inc. Elizabeth Simon \$5,000.00
- 3. Calculate the average monthly year-to-date income for each of the following jobs:
  - Franklin Elementary School Peter Simon
     \$3,708.32 or \$3,708.00 (averaged over 5.5 months)
  - Web Vision Inc. Elizabeth Simon \$5,034.98 or \$5,035.00 (averaged over 5.5 months)
- 4. Does the year-to-date income support stable monthly base pay?
  - Franklin Elementary School Peter Simon yes
  - Web Vision Inc. Elizabeth Simon yes
     If no, what additional documentation is required none
- 5. Calculate the average monthly income for Peter Simon's second job with Learning Centers of America: \$450.70 or \$451.00 (29.75-month average)
- 6. Do the past two years of W-2s support a history of stable income?
  - Franklin Elementary School Peter Simon yes
  - Web Vision Inc. Elizabeth Simon yes
     Is additional documentation required? no
- 7. Are there any loan deductions reflected on the pay stubs?
  - Franklin Elementary School Peter Simon no
  - Web Vision Inc. Elizabeth Simon yes

If yes, does the deduction need to be included in the borrowers' total debt ratio?

Because the loan is a 401(k) loan secured by the borrowers' retirement savings, and the value of the asset is greater than the outstanding balance of the loan, it typically does not need to be included in the total debt ratio.

#### Exercise 3: Verifying Assets

- Do the bank statements include all the required information?
   yes
- 2. What is the current balance for the checking account? \$1,366.64

What is the current balance for the savings account? \$5,562.01

3. What concerns, if any, do you have regarding the bank statements?

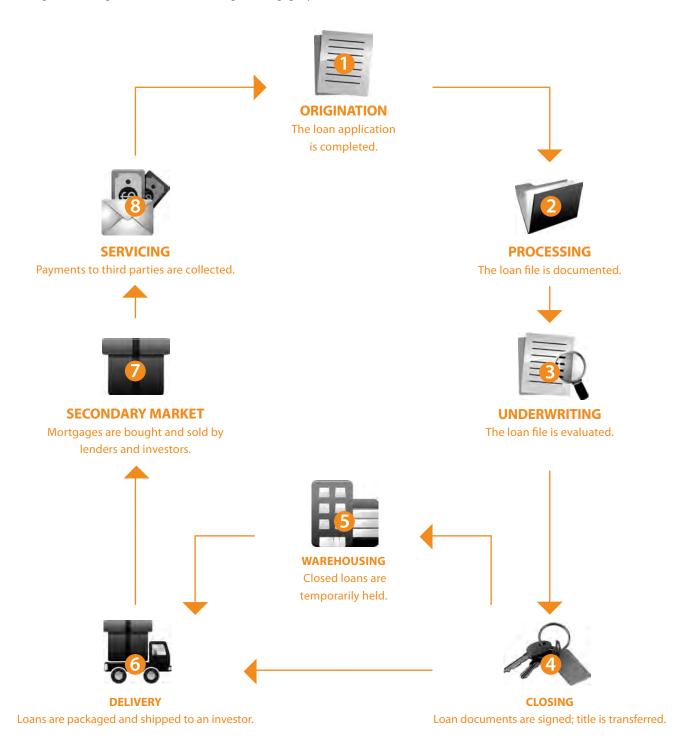

There is a recent, large deposit of \$8,000 on 04/02. The \$3,000 earnest money cash deposit is not verified on the bank statement. This may require follow-up if there is not adequate cash for closing and reserves (if required).

- 4. Do the statement dates cover the required two-month time period? yes
- 5. If the large deposit of \$8,000 was due to a gift received from a relative, what documentation is required?

  Donor's name, relationship to the borrowers, mailing address, phone number, address of the subject property and the amount of the gift. The donor's signature is required if the above information is provided in the form of a gift letter.
- 6. If the large deposit of \$8,000 was due to a sale of a personal asset, what documentation is required?
  Provide proof of ownership of the asset being sold.
  Provide verification of the value of the asset being sold from an acceptable third-party source. Provide a copy of the bill of sale and evidence of receipt of funds.
